

I pay for my satellite radio, just like I pay for my satellite television. This is far superior to either cable or the signals put over the "free" airwaves. Because of the fact this is a premium or pay service they should be afforded more opportunity to compete with the local networks. FM or AM signals are now almost totally controlled by three major players in the radio market. Why allow those three superpowers all the rights, you shouldn't. Reject the NAB's petition 04-160.
Thanks.
